HOBIE TWIST AND SEAL HATCHES

TWIST AND SEAL HATCHES have a better seal. The lids also hinge open, so you never lose the lid. Designed with a cork-screw-like mechanism for closure, a simple twist of the handle opens or closes the hatch. As the screw pulls down the hatch, you get a tight seal on the "O Ring" seal against the inner cylinder. The hatch seals around the edge of the cylinder and does not have to be held down against a flat surface to seal. This allows the hatch to seal even if the lid is partially open or tipped. Flip the handle into the recess to "lock" it closed. Available in 6" and 8" diameters. These hatches are now standard equipment on all Hobie Kayaks.

*Retrofit kits include gaskets (and 2 ea #8031130 screws for the 8").

TECH TIP!

HATCH COVER KITS: The small, 4" diameter, covers are hand sized and are often used behind the rear crossbar for access to the transom. The 5" diameter hatch covers are about the maximum size that the Hobie 14 and 16 foredeck can handle. The 6" access port kit is now a screw-in port, just like the 4" and 5". Prior to 1989, Hobie Cat used a pop-in port on the Hobie 18. Water would seep into the hulls through the rope-handle holes. Replacement with the screw-in ports eliminates that condition.
