TECH TIP!

HATCH COVER KITS

The small, 4" diameter, covers are hand sized and are often used behind the rear crossbar for access to the transom. The 5" diameter hatch covers are about the maximum size that the Hobie 14 and 16 foredeck can handle. The 6" access port kit is now a screw-in port, just like the 4" and 5". Prior to 1989, Hobie Cat used a pop-in port on the Hobie 18. Water would seep into the hulls through the rope-handle holes. Replacement with the screw-in ports eliminates that condition.

HOBIE TWIST-N-SEAL HATCHES

These new Hobie hatches are designed to have a better seal. The lids also hinge open so you never lose the lid. Designed with a cork-screw-like mechanism, a simple twist of the handle opens or closes the hatch. As the screw pulls down the hatch, you get a tight seal on the "O Ring" seal. Flip the handle into the recess to "lock" it closed. Available in 6" and 8" diameters. These hatches are now standard equipment on all Hobie Kayaks. (*Includes mounting gasket)
