TECH TIP!

COVERS

Protect sails and hardware from sun and abrasion damage. Perhaps the greatest enemy of many modern fabrics is the sun's ultra violet radiation. It deteriorates nylon unless it's specially treated and it attacks dacron sail cloth and weakens it. Fortunately, nylon can be treated to make it UV tolerant and acrylic fabrics exhibit seemingly endless resistance to UV radiation. These sail bags and sail covers can be used to protect your dacron sails from UV radiation damage.

SNORKEL JIB COVER

Protect your roller-furled jib from attack by ultraviolet light and the weather. Easy to install and remove—the Snorkel is a must for protecting your expensive sail from eventual destruction by the elements. The Snorkel is a zip-on cover for roller-furled jibs. Made from durable fabric with a full length zipper. Snorkle covers are not intended for long term storage. Jibs must be furled tightly, have luff tension and be secure for windy conditions. Loose jibs and cover may cause chafing damage to sail.
