

**RAIL RUG**

Provides excellent footing when out on the trapeze. Kit includes a high quality grade of carpeting which absorbs less water, keeping weight down and reducing mildew. Also included in each kit; industrial grade contact cement (much better than the hardware store variety), brush and easy to follow instructions. For all catamarans.

- 1671BLK H14/H16-Black \$36.99
- 16703 Contact Cement-Pt \$9.95

**NEOPRENE RAIL KITS**

Provides excellent footing while out on the trapeze and cushions the non-skid areas. Eliminates abrasion on your skin or clothing because it sheds sand. Zero water retention. Made out of 1/8" thick knobby black neoprene. Kit includes industrial grade contact cement, brush, and instructions for easy installation on any boat. Race strips are for hull decks rear of trampoline frame. H16 kits are full wrap around as used in Worlds boats.

- 16706 H14 / H16 Kit \$55.99
  - 16707 Race Strips-Pair \$6.39
  - 16708 H18 Kit \$58.99
- (H18 Die Cut - Shown Above)

**TECH TIP!**

**TRAPEZING**

While sitting on the edge of the boat, attach the trapeze dogbone to the trapeze hook on your harness. Grab onto the trapeze wire's handle with your forward hand. Place your other hand on the hull behind you. Using your hands for balance ease yourself off the side of the boat and place your forward foot on the rail. Push yourself away from the boat with your rear hand and forward foot till you can place the rear foot on the rail. Stand on the rail of the boat with your weight on the trapeze wire. Keep your forward leg more ridged and aft leg slightly bent. This position will help keep you from falling forward.

While learning to trapeze, beginners should set their trapeze height just at the rail level or slightly above. This will make it easier to get in and out. Keep your legs spread several feet apart for balance. As you get used to the feel of trapezing you can begin to lower your trapeze height and move your legs closer together. Once you become an expert on the trap wire, your proper body position should be parallel to the deck with your feet right next to each other.

**FOOT STRAPS / CARRYING HANDLES**

Stop that unexpected "JOURNEY TO THE BOW." Add foot straps for the skipper and crew for security on those screaming reaches. Also, just right for lifting the boat instead of dragging it up the beach.

- 1241 Pair \$9.49

**REMOVABLE SHEAVE TRAP RIG BLOCK**

This is the block we include in our basic trap rig kits. No need to cut wires to install this block. Simply remove the clevis pin that acts as the sheave axle, slide the sheave out of the frame, place the frame through the trap wire thimble and reinstall the sheave.

- 3103 Each \$8.19

**TRAP STAY**

An easy answer to wandering wires and "who's whose" confusion on the Hobie 16. Mount these little keepers under the side rails and drop the shockcord in. Works great to keep everything in its place.

- 176 Pair \$8.29

**ROPE LOCK**

Use on trapeze rope to make your trapeze system adjustable.

- 61530000 Each \$2.50

**TRAPEZE RIG RETURN SYSTEM**

Custom system with double-length shockcord reduces the unpleasant forward pull when you're trapped out off the stern on a reach. It also prevents breakage of the shockcord when you stuff a lee bow and the crew takes a spin around the forestay. All required hardware is included.

- 14709 H16 Kit \$32.39

**EASY RITE**

Internal shock cord recoils this righting line automatically. Made from 1/2" hollow braid line with internal shockcord. It requires no blocks or shackles. Installs in minutes without tools. Also functions as crew safety line. Our best selling righting system.

- 30105 H14/16/17 \$59.99
- 30106 H18/21 \$65.99
- 30108 H20 \$75.99
- 30109 Getaway \$56.99

**EASY UP**

Favored Hawaiian style righting line system and trapeze safety line. (H14/16 only.) Retracts fully—it's there when you need it and out of the way when you don't. No tools required to install.

- 30101 H14/16 \$73.99
- 30102 H18 \$79.99

**THE UPRIGHT SOLO RIGHTING SYSTEM**

The Upright installs easily. No holes to drill, no measurements are needed. Attaches in five minutes to the existing shroud adjusters with a pair of pliers. Racing rules allow carrying the Upright for emergencies, but it may not be used while racing. The Upright is designed for a single reason, to make sailing your small catamaran safer.

- 1263 H16 \$133.00
- 1264 H18/20 \$145.00
- 1265 H17 \$133.00

**ANTI PITCH POLE HYDRO FOIL**

A simple bow plane that attaches to the bow tang bolt. As the bow starts to dive the bow plane's 55 square inches of surface comes in contact with the water and halts the submerging of the bow before the deck goes under water. Easy to install or remove for racing. Makes sailing a lot more fun for the recreational sailor.

- 30110 H14/16 Pair \$123.99

**RIGHTING BUCKET**

Simple, easy to carry, and easy to use. Comes complete with no-rot canvas bucket, premeasured line, shoulder pad (not shown) and snap. The righting bucket holds as much as 150 pounds of water to assist your body weight to right your catamaran.

- 30107 Kit \$70.99

**SHROUD EXTENDER**

Tension and de-tension shrouds easily for the "perfect" rig tension. Use in conjunction with "shroud extending" righting systems for complete re-tensioning while out on the water. Requires shrouds to be shortened. Check class rules for racing.

- 10049 Each \$69.75

## TECH TIP!

### RIGHTING YOUR HOBIE

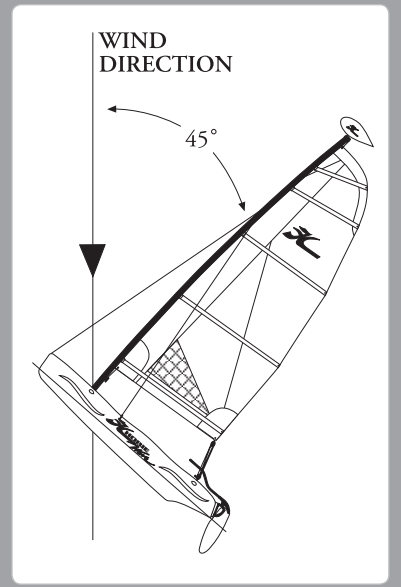

On that reach...flying through the air and water then...WHAM!!! Your Hobie Cat has forced you to swim instead of sail. Not really what you had in mind? If you have planned ahead you will be up and sailing again quickly. Whether sailing single handed or with a few friends, righting your boat can be quick and easy...

First, preventing your mast from becoming one with the bottom, or "turtling" is a priority. We at Hobie have designed mast floats to help keep your Hobie Cat from becoming a 'mudhen'. The floats attach to the top of your mast and will prevent the mast tip from sinking.

The next objective will be to get back to sailing! Righting systems vary a bit, but the theory is the same. A line is attached to your Hobie, thrown over the hull in the air and then weight (yours and or your friends) is used to lever the boat back to an upright and sailable position.

After you have checked that everyone is OK, turn your hulls and mast into the wind (see diagram) and uncleat your sails. You and your friend now need to congregate on the hull that is in the water. Grab the righting line, lean away from the trampoline and get as close to the water as you can. Try to stay out of the water. If you don't have enough body weight to right the cat we have the Righting Bucket! Just attach it to the boat, with the hook that is provided, throw over the upper hull and fill the bucket with water! With the bucket strap over your shoulder, lean your weight out from the boat. The bag comes clear of the water and up the cat will come!! Grab the dolphin striker or crossbar as it comes up, climb aboard, sheet in and GO!

Tipping your Hobie over can be a great way to cool off and enjoy the water... try it! It's excellent practice for when you weren't planning to go for a swim but your Hobie decided that you needed to cool off!

30112 "Mama Bob Kit" Shaft Mount

30119 "Mama Bob" Bracket Mount

30115 "Baby Bob"

### UNIVERSAL MAST FLOAT

"Mama Bob" Helps to prevent turtling. Displaces 59 pounds of water to help keep the mast from going full turtle (mast straight down). The Hobie mast float will give you the time you need when preparing to right the boat without the worry of going turtle. It also helps prevent damage to your rig and sails that can be caused if the mast head contacts the bottom when capsized. This streamlined float is shaft mounted to the side of any mast and is easily removed for racing or trailering. This float is contoured and held in alignment with the mast for minimum drag while sailing. Includes shaft mount hardware and fasteners.

30112 Fits all cats \$228.00

### MAST FLOAT

"Baby Bob" Designed by the Hobie Cat team to offer the safety and security of mast head flotation while limiting the resistance (drag) through the air. The Hobie mast float can give you the time you need to prepare to right the boat without the worry of going turtle (mast straight down). This also helps prevent damage to your rig and sails that can be caused if the mast comes in contact with the bottom when capsized. This mast float is standard on all Hobie Waves. It is fixed in position to the mast head and rotates with the mast. Displaces 32 pounds of water and measures 1/2 cubic foot in volume. Bracket mounting allows easy removal for racing or trailering. Kit includes mounting brackets and fasteners.

30115 Wave, H14, H16 \$118.00

### MAST FLOAT

"Mama Bob" Float (Standard on the Getaway) offers more flotation volume while using the same mounting system. Displaces 59 pounds of water (just under 1 cubic foot in volume). Mama Bob has nearly the same vertical dimension as the Baby, but it is wider. More volume further inhibits a boat from going turtle when capsized in rough and windy conditions. Kit includes mounting brackets and fasteners.

30119 Getaway \$146.00
