

# HOBIE KAYAK SAIL

ADD SAILING TO YOUR HOBIE MIRAGE KAYAK EXPERIENCE!

## MIRAGE KAYAK SAIL RIG

Add sail power to Hobie Mirage Kayaks! (Fits all current models of Hobie Mirage Kayaks). The Patented MirageDrive pedal system allows you to pedal while sailing which helps you to maintain forward motion through turns and obtain higher speeds. Sail with ease maintaining excellent speed with or without pedaling while sailing. Easily pedal out to sail or pedal home when the wind is too light. Add a SideKick ama kit for additional stability if desired.

## HOBIE MIRAGE KAYAKS... THE ONLY KAYAKS THAT CAN DO IT ALL

Paddle kayaks do not have the necessary lateral resistance needed nor do they typically have a rudder for steering. Paddle kayaks require hands-on paddling which prohibits use of rudder and sail controls for sailing. The MirageDrive pedal system allows you to pedal out onto the water to sail and pedal back if needed. You can also pedal the boat through a tack (turn). The MirageDrive pedal system's fins act as a keel or centerboard when in the down position offering the lateral resistance needed for upwind sailing. Hobie Mirage kayaks are equipped with a hand-controlled rudder. The MirageDrive allows hands to be free for sail and rudder controls.

**SAIL KIT** includes two piece mast, sail (20.25 sq ft.), lines, fittings and storage bag.

Add the large rudder #81397001 for more responsive rudder control. Adventure models can add the dagger board for enhanced upwind performance.

**SAILING TIP!**

**SAIL POWER** Watch the sail, pay close attention to the trim or adjustment of the sail. When the front of the sail, just behind the mast, luffs or flutters in the breeze, you lose power. To start moving, pull the sail in just enough to stop the sail from luffing or turn the boat away from the direction the wind is coming from. There are also short ribbons hanging on either side of the sail called "tell tails". The tell tails react to air flowing over the sail and will help you see that the sail is pulled in too tight or too loosely. If you pull the sail too tight you will stall the sail power. The tell tail on the back side of the sail will drop or do circles. Ease the sail out until it luffs, then pull it in just a little until it stops luffing. You will adjust the trim whenever the wind changes direction or you change course.

**HAVE A HOBIE MIRAGE ADVENTURE?  
CONVERT TO THE ADVENTURE ISLAND!**

**ADVENTURE ISLAND CONVERSIONS**

The Hobie Mirage Adventure (2007 model and newer only\*) can be converted into an Adventure Island! These kits allow you to add just the amas or go all the way to Adventure Island with the amas and sail combined. Great sailing performance and excellent stability.

**The complete kit includes:** A boomless, roller-furling sail rig, plenty of sail area for excellent performance, all manageable from the cockpit with the pull of a line. Two amas that fold up against the side of the boat for easy docking, maneuverability, and transport. The Adventure Island kit is loaded with additional standard features such as a daggerboard; large "Twist and Stow" rudder; Mast and Sail Cover; and an Aka/ Daggerboard Bag. Does not include the 2011 and newer rudder for Islands. This rudder can be purchased separately for upgrades to 2011 and newer Adventure hulls. \*2007 and newer Adventure Kayaks have inserts molded into the hull that the crossbars mount to. **Conversions kits are available in V1 crossbar / aka configuration only.**
